

PRECISION AT ITS BEST: The TRUMPF Carbon Laser Advantage

At The Williams Brothers Corporation of America, we proudly craft high-quality access doors in the USA. Central to our process is the state-of-the-art TRUMPF carbon laser, which delivers unmatched precision and efficiency.

CUTTING-EDGE TECHNOLOGY – The TRUMPF carbon laser ensures flawless cuts through steel and other metals, enhancing both structural integrity and aesthetic appeal. This technology enables us to customize doors for diverse projects, from large-scale commercial builds to specialized applications.

PROUDLY MADE IN THE USA – We meet all Buy America requirements by using domestically sourced steel, supporting local industries while delivering durable, sustainable products.

WHY IT MATTERS – This laser technology allows us to achieve precise cuts and intricate designs; minimize material waste; and consistently deliver superior quality.

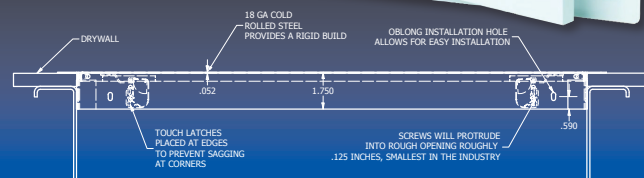

By combining innovation and American craftsmanship, **The Williams Brothers Corporation of America** sets the standard in the access door industry. 🇺🇸

WB B2 Series Touch Latch Access Panels with No Cam Latches

The **WB B2 metal access panel** comes standard in sizes **8x8, 12x12, 14x14, 16x16, 20x20, and 24x24**. Door features a fully-concealed hinge, two concealed touch latches, and an exposed flange. Options include stainless steel construction and custom colors. Offering a seamless finish with lack of noticeability, door is a perfect solution for applications where cam latches do not want to be shown.

Door: 18 ga. steel
Trim: 18 ga. steel
Finish: Primed white baked enamel, paintable surface
Latches: Heavy Duty Concealed Touch Latches
Hinges: Concealed Hinge

- Fast delivery
- Economical solution
- Quick and easy installation
- Superior engineering and innovative design

INNOVATION SPOTLIGHT

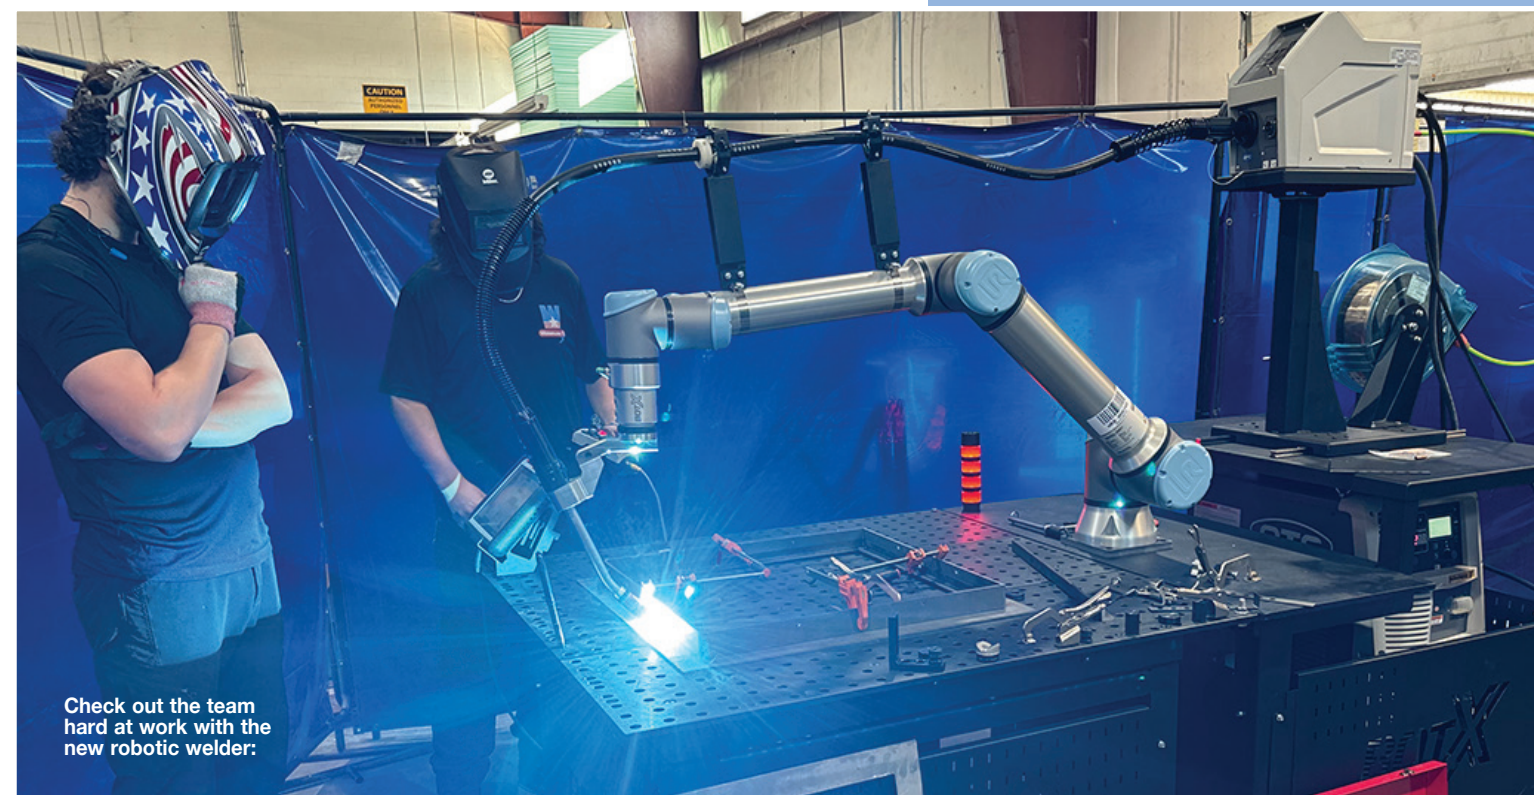

Precision Welding for High-Security Access Doors

At The Williams Brothers Corporation of America, we're thrilled to introduce our latest addition to the production floor—a **new robotic welder machine!** This cutting-edge technology allows us to produce our **HG-SEC-100 Series High Security Access Door** with unparalleled precision.

Capable of welding up to **7-gauge steel**, this machine ensures the highest level of quality and consistency for our doors. The HG-SEC-100 Series is proudly **Made in the USA** and designed for high-security applications, including:

- Mental health hospitals
- Prisons
- Courtrooms
- Other critical facilities

Our investment in this advanced equipment underscores our dedication to innovation, efficiency, and delivering secure, reliable products to our customers. 🇺🇸

Check out the team hard at work with the new robotic welder:

SUPPLYING SUPERIOR ACCESS DOORS

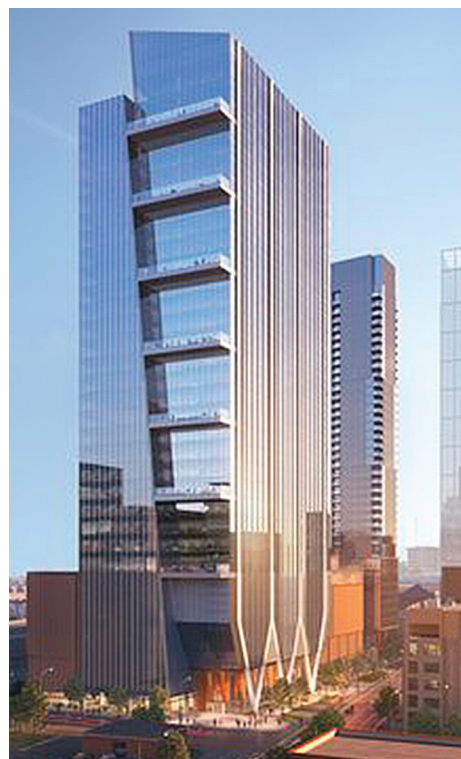

111 South Tryon, Charlotte, North Carolina

The Williams Brothers Corporation of America is proud to be part of the construction of the prestigious **111 South Tryon project**. As a development that defines luxury and innovation, this endeavor represents the pinnacle of modern architectural design.

For this monumental project, we are delivering our state-of-the-art **DW405 Phantom Series, RDW410 Series, and DWAL412-HD Series**. Each product exemplifies our commitment to excellence, combining durability with refined aesthetics to seamlessly integrate into the project's luxurious and functional design.

◆ **DW 405 Phantom Series:** Known for its sleek and inconspicuous design, the Phantom Series ensures that access panels blend effortlessly into their surroundings while maintaining superior performance. This series is proudly made in the USA.

◆ **RDW410 Series:** Designed for robustness and reliability, this series offers versatility for a variety of appli-

cations while upholding the high standards of safety and durability. This series is also proudly made in the USA.

◆ **DWAL412-HD Series:** Engineered for heavy-duty applications, this series is the perfect solution for spaces requiring enhanced security and durability

without compromising on aesthetic beauty.

The **111 South Tryon project** will feature our high-quality access doors in strategic locations, ensuring functional accessibility for maintenance while complementing the architectural elegance of the venue. Our products are tailored to meet the demands of such high-caliber projects, reflecting our unwavering dedication to quality, safety, and design excellence.

As we collaborate with the project's developers, Riverside Investment & Development, and their visionary team, we are reminded of our mission: **to provide industry-leading solutions that elevate every project we touch.** The **111 South Tryon project** is set to become a cornerstone of architectural innovation, and we are honored to contribute to its success.

Stay tuned for more updates on this remarkable project as we continue to make strides in delivering the best in access door solutions. 

From Angie's Italian Kitchen:

Holiday Favorite Sausage Italiano

INGREDIENTS:

- 3 Italian sausage links sliced in 1/2" sections
- 1 Med. onion sliced in thin rings
- 2 Med. Red peppers sliced thin
- Dash of salt and pepper
- 3 Tbsp Olive oil

- saute onions in olive oil until caramelized (or less) stir gently to prevent sticking, remove from pan and set aside
- saute peppers, in the same pan until tender, add olive oil if needed, remove from pan and set aside, salt and pepper to taste
- cook sausage slices in the same pan, cover, until well done, add olive oil if needed
- mix all finished ingredients together and serve with your favorite pasta dish with olive oil and garlic, or at a picnic, on an Italian bun

Buon Appetito!
